Medical skin care for acne

Systematically healthy skin!

DERMASENCE is "Brand of the Century"

DERMASENCE has been establishing standards with its medicated skincare for over 30 years and has become the epitome of efficacy and tolerance. For this, DERMASENCE received the prestigious "Brand of the Century" award. This means that one of the strongest German brands can be found in pharmacies.

As the leading brand in this segment, DERMASENCE represents the generic concept of medicated skincare – and the knowledge of what the skin needs to be healthy.

What does DERMASENCE stand for?

Innovative products and dermatological expertise

DERMASENCE medicated skincare is developed in a close collaboration with dermatologists. Years of experience and the implementation of innovative ideas have resulted in a programme that supports health maintenance and the regulation of skin functions. The medicated skincare programme offers products for the entire family.

Very high tolerance – intensive effect

DERMASENCE is the medicated skincare specialist. Since its founding in 1991, the brand has become the epitome of effectiveness and tolerance. When combined intelligently, innovative active ingredients create precise solutions for every type of skin as well as for problem skin – for example, atopic dermatitis, rosacea or acne.

DERMASENCE continues innovatively to contemplate the power of plant and combines pharmacologically proven natural active substances with modern formulations. In this way the invaluable ingredients unfold their effectiveness through unique extraction processes. Highly compatible and effective.

Day after day – from head to toe.

Competence for your skin:

- Innovative products
- Modern active ingredients, intelligently combined
- Considerate to sensitive skin
- Own extracts in established bases
- No harsh fragrances
- Regulation of the skin's pH value

What is acne?

! Several factors always play a role in the development of acne. The activity of the sebaceous glands and their size are genetically determined. However, this alone does not cause acne.

The main cause is an increase in sebum production, which is often hormonal. An additional excessive hornification of the skin initially causes blackheads (comedones) to form, predominantly in the so-called T-zone (forehead/nose/chin), on the décolleté and on the back.

This clogging of the pores prevents the excess sebum from draining. If the acid mantle of the skin is also disturbed, e.g. by frequent washing or strong degreasing cleansing products, the increased colonisation of bacteria is promoted. Mild to severe inflammatory foci can develop.

If these are covered with powder or make-up that is not suited to the skin type, or if the pores are clogged, or if the pimples are picked or squeezed, they worsen and can lead to unsightly and persistent scarring.

Acne is one of the most common skin diseases in adolescents during puberty. However, adults can also be affected by the appearance of papules, pustules and nodules into old age (acne tarda).

Skin care tips

- Cleanse your skin twice a day with an activating cleansing foam.
- A cooling and soothing toner prepares the skin for subsequent care.
- Light gels or gel creams are well suited as day care to mattify the skin and refine the pores.
- Fruit acids can refine the skin and reduce blemishes - they are particularly suitable as night care.

Your dermatologist or pharmacist will be happy to advise you on which products from the DERMASENCE programme are best suited for you.

Product recommendations

Cleansing

Cleansing

Mousse Cleansing foam

A cleansing foam with modern, latest-generation, active ingredients cleans deep into the pores. Recommended for skin that is impure and or in need of activation. Thanks to the optimisation of the skin's pH value it contributes to the regeneration of the skin's protective acid mantle and refines its appearance. Without propellant.

Tonic

The moisturising facial tonic water refreshes and soothes skin after cleansing. It regulates the pH value and is very well tolerated thanks to its low alcohol content. Also suitable as a mild aftershave.

Skin care

Daily care

Seborra Soothing gel cream

This pore-refining gel cream is ideal for oily, acne-prone skin. An extract complex has an anti-inflammatory effect. The gel cream has an immediate skin-soothing and mattifying effect. In the long term, the pores appear finer and the skin clearer. Sebum production is regulated and impurities are prevented. Niacinamide counteracts the formation of pimple marks. The light gel formulation is quickly absorbed and is ideal as a make-up base.

Seborra Light gel cream

The light gel cream has been specially designed to nourish combination and oily skin. It has pore-refining and calming effects thanks to its special active ingredients. The non-comedogenic formulation sinks in quickly.

Day care with SPF

Seborra Light day cream with SPF 30

The light gel cream with a high level of UV protection is ideal for sensitive and oily skin and for (combination) skin with a tendency towards impurities. Innovative UV-A-/UV-B- filter system protects face, neck and décolleté against UV-induced skin damage. The unperfumed sun protection is ideal for skin with a tendency towards rosacea, allergies and Mallorca acne.

Seborra Tinted day cream with SPF 50

Impurities and reddened skin are balanced with green pigments, giving the skin a fresh complexion. The tinted day cream provides an immediate, matt finish and a long-lasting anti-shine effect, ideal for oily, impure skin. The high sun protection factor protects against pimple marks and pigmentation spots. Niacinamide counteracts increased sebum production.

Night care

Night care

Seborra Skin clarifying serum

AHA

The high-quality, skin-clarifying serum is ideal as a night cream for oily, impure and acne-prone skin. An innovative complex of dyer's woad and other plant extracts which has anti-inflammatory properties. The mild fruit acid complex reduces inflammation and clears clogged pores. The serum soothes irritated skin, reduces redness and can prevent the development of pimples. It leaves a healthy and clear complexion.

Seborra Skin clarifying body lotion

AHA

The lotion combines the positive properties of fruit acids with the soothing effects of moisturising urea compounds. It can also be used for impure, acne-prone skin as well as for face and body care. It is ideal for more mature skin as a light lotion to treat age- and intensive solar radiation-related wrinkle formation.

Cleansing scalp

Special care

Seborra Zinc repair foam

This skin-soothing acute care supports the skin's own regeneration processes for irritated, stressed or blemished skin with zinc and panthenol. Also ideal after aesthetic treatments. The light repair foam spreads easily without friction. Hold the dispenser upright for the best application.

Met een unieke, 3-voudige werking:

Zinc Silver Panthenol

Seborra Pimple relief roll-on

The easily applied fluid and is ideal for use at the first sign of pimple formation. Boswellia extracts counteract redness and swelling. Feelings of pressure and irritation are quickly reduced. Gluconolactone is a mild natural fruit acid, which effectively counteracts renewed comedone formation and refines skin appearance. The roll-on features a stainless steel ball that guarantees hygienic application. Promptly apply the gel several times a day as soon as signs of redness, swelling or feelings of pressure appear.

Cleansing scalp

Seborra Shampoo

The shampoo uses the active ingredient Octopirox® to stop dandruff and oiliness of the scalp. It can be used to support treatments for itchy scalps. Nourishing substances, such as allantoin and panthenol keep the scalp supple.

Product recommendations

Sun protection

Sun protection

Solvinea Med SPF 50+

The light gel cream with extra-high UV-A / UV-B protection is suitable for sensitive and oily skin as well as skin susceptible to blemishes. It protects areas particularly exposed to the sun, such as the face, neck, décolleté and hands, against UV-related skin ageing. The unscented sun protection cream is easy and pleasant to apply, and is ideal for those prone to allergies and Mallorca acne. Bisabolol, panthenol and vitamin E care for and soothe the skin, leaving it feeling healthy and glowing.

Individual care – optimally adapted to your skin type

With daily skin type-specific care at home, you can get a good grip on blemishes and excessive sebum production. Your dermatologist can offer you various treatment options for the inflammatory skin changes – depending on the severity and location of the acne.

Mild to moderate acne can usually be treated externally – often as a combination of several procedures.

These include

- fruit acid peels with anti-inflammatory salicylic acid, combined with glycolic acid, which dissolves cornifications
- peeling treatments with vitamin A acids
- creams / lotions containing antibiotics

In severe cases, your dermatologist will prescribe additional medication.

In addition, dermatological-cosmetic skin care institutes offer professional treatments to rebalance the skin functions, loosen cornifications and regulate the sebum drainage, e.g.

- manual, hygienic cleansing of the skin
- fruit acid treatments
- enzymatic or mechanical peelings
- sebum-reducing, anti-inflammatory and cooling masks

Feel great in your skin!

Many dermatologists trust in our products

DERMASENCE is being developed in collaboration with dermatologists. The products are often used for skin problems and to supplement aesthetic procedures.

Efficacy and tolerability are the DERMASENCE's focus – our formulations are kept up to date with the latest scientific developments.

This medical skin care is available in pharmacies – recommended by dermatologists and ideal for the whole family.

- Product overview

Our care system

The unique system will help you to decide on the best care for your skin type quickly and easily.

The colour code

It shows you how suitable each product is for a particular skin type. Multiple coloured dots are possible.

Normal skin

Skin with balanced lipid and moisture balance.

Dry skin

Is prone to irritation and sensitive to environmental influences and ingredients and/or prone to allergies.

Oily, acne-prone skin

Is shiny with coarse pores and frequently develops blackheads and pimples.

Anti-ageing care

Skin that has developed its first fine lines and lost some elasticity and gratefully absorbs special active ingredients; it should be protected from UV radiation.

The care symbols

These will give you guidance on how to use the products.

Cleansing

Daily care with UV protection | sun protection

Night care

Daily care – these products can be used daily in the morning and evening.

Special care – is often used alongside therapy treatments for problem skin

Facial mask

Eye care

The lipid levels

They show whether it's a non-oily or lipid-rich product.

0	1	2	3	4
				
				
				
				

0 Non-oily product

1 Product with low lipid content

For oily or combination skin

2 Product with medium lipid content

Used as daily care for normal skin; in case of oily skin partly also suitable as night care

3 Product with higher lipid content

For rather dry skin or as night care product for normal skin

4 Product with high lipid content

For very dry skin

DERMASENCE
